

MINISTERS TELL OF THE WORK DONE

Ministers and Public Members Address Red Deer Audience

Bulletin Special.
Red Deer, Mar. 12.—The Lyric theatre here last night was crowded to the doors by a throng of people eager to listen to the addresses given by the Hon. W. H. Cushing, minister of public works, the Hon. W. T. Finlay, minister of agriculture and local member address Red Deer audience.

President Moore in a few appropriate introductory remarks introduced the speakers to the audience, expressing the pleasure he felt in the opportunity to have introduced to the Red Deer people on their first appearance before the people of Red Deer on the public platform.

Hon. Mr. Cushing Spoke.
Hon. Mr. Cushing, in his speech, was greeted with shouts of hearty applause, for the reputation as a capable and practical leader of the north, and department has had under its immediate supervision all the work done here since the creation of the province from the international boundary to the westward, and the network of roads being spread over the province as rapidly as possible.

During the past year alone 266 bridges were built with 256 of which were new structures and several were new bridges. The total expenditure on bridge building was estimated to \$380,000.

Another work of prime importance in the past year was the surveying and building of roads which the government had undertaken to complete, and the expenditure on this important item of road building was estimated to be \$1,000,000.

While \$50,000 was paid for right of way and securing.
These services had been operated by the department during the year five of which were newly built and improved. New highways had been opened in the north and the coal mines act, another steam boiler inspection having been given to the Red Deer district.

Public Buildings Going Up.
A staff of architects had been chosen to design the public buildings, which were designed all the new public buildings. The construction of the new public buildings was last year under construction as well as the preliminary excavations and the foundations of the buildings, while plans are already prepared for several new buildings.

As a result of the telephone policy adopted by the government in September, 1906, and vigorously pursued during the past year, 145 miles of line had been laid and 51 new exchanges had been installed in 108 communities. The expenditure in all of this work in telephone line in operation was \$2,282,292, and for the extension of the telephone system, a sum of \$1,000,000 had been passed in the estimates for public works in 1906, while a supplementary sum of \$1,000,000 was voted for the operation, construction and extension of telephone lines.

Mr. Cushing's good presentation of the splendid array of facts concerning the government's work was more than counterbalanced by the applause of his audience. The Hon. Mr. Cushing was met with a warm reception by the audience, and his speech was met with a warm reception by the audience.

Hon. Mr. Finlay Spoke.
Hon. Mr. Finlay spoke in a few appropriate introductory remarks, followed by a pleasing speech in which he set forth mainly the branch of the work being carried on by his department in the interests of the farmer. He made some reference to the paramount importance in a province so largely agricultural as the one in which he was speaking.

Mr. Finlay stated that the claims of the Red Deer people for the attention of the government were not only being given full consideration by him. The minister referred with pleasure to the government's interest in the farmer, and the government's interest in the farmer, and the government's interest in the farmer.

San Francisco, Cal., March 11.—The United States judge, Judge James M. Schmitz, on the extortion indictment against the late Senator, J. P. McGuire, has ordered that the case be submitted to a jury. McGuire has been in jail nine months.

TENDERS FOR SIX SECTIONS OF G.T.P.

Tenders Opened For 355 Miles of National Transcontinental—Will Employ 30,000 Men.

Ottawa, March 12.—Tenders for the construction of the 355 miles of the national transcontinental railway, covering six sections between Moncton and Lake Nipigon, were opened by the commissioners yesterday. Nineteen tenders were received, and the lowest bid was \$1,000,000. The work was the case last year, when labor was more scarce and wages higher. It is understood that the figure quoted on this spring by contractors was little lower than last year's.

The names of the successful tenders were not known for some weeks. The names of the successful tenders were not known for some weeks. The names of the successful tenders were not known for some weeks.

THE HINDU QUESTION WAS UP IN THE HOUSE

No Information Can Be Given Concerning the Proposed Bill. The Test Has Been Made—Senator Hughes Would Warrant Immigration Limited.

Ottawa, Mar. 12.—In the senate yesterday, Senator Macdonald, of Victoria, introduced a bill to limit the immigration of Hindus. The bill was introduced in the senate yesterday, and the test has been made.

CHINA RELEASES THE TATSU MARU

Under Pressure and Recognizing Japan's Strength to Enforce Her Demands.

Peking, March 12.—The Chinese government yesterday weakened under pressure of Japan and agreed to release the Tatsu Maru and her cargo of war munitions about a month ago off Kia Choo. Yesterday the large kingdom's apology for its "wrong" act was handed to the Japanese minister for transmission to his government.

The statement is as follows: "The Tatsu Maru anchored first off China coast in the winter of 1904, but it was not until the Chinese government was put on, and as the balcony seats were all crowded with visitors, the play kept the crowd in continual applause. Hurry and party left for South this morning."

The Tatsu Maru anchored first off China coast in the winter of 1904, but it was not until the Chinese government was put on, and as the balcony seats were all crowded with visitors, the play kept the crowd in continual applause. Hurry and party left for South this morning.

U.S. TARIFF MUST BE CHANGED SOON

The Declaration of Republicans of the State of Ohio Praught With Significance.

Washington, March 11.—Nothing in the preliminary campaign for the sufficiency has aroused so much attention among political leaders in both parties as the tariff declaration adopted by the Ohio republican convention in case Taft is elected president.

As the secretary of war is so far in the lead of the other candidates, the Democrats assume the Ohio declaration will be repeated by the Chicago convention, and they already are changing their plan of campaign on the basis of this declaration.

It is immediately popular with the Republicans as well. Even the stumpers think the Dingley tariff is a good one, and that by next year it will be time for a new tariff, and that by next year it will be time for a new tariff, and that by next year it will be time for a new tariff.

It is immediately popular with the Republicans as well. Even the stumpers think the Dingley tariff is a good one, and that by next year it will be time for a new tariff, and that by next year it will be time for a new tariff, and that by next year it will be time for a new tariff.

NO SCARCITY OF BRICK EXPECTED THIS YEAR

Output of Five Brick Yards Will Be 20,000,000. Building Operations Expected Not So Retarded—New Company Recently Organized.

With a total output of about 20,000,000 brick from the various brick plants in the city there seems little likelihood that building operations in the city will be retarded during 1926, as in former years, through a scarcity in brick supply. The four plants, which have been in operation here for some time and which are engaged in the erection of two more large plants, the Acme Brick company's plant on the C. N. R. between here and the West, and the Pressed Bricks Ltd., east of the city, and the Gallegos plant on the south side of the Saskatchewan river. This will increase the supply of brick manufactured in the city by about eight million bricks over that of last year.

The brick plants that will assist in the supply of brick during the year include that of the twenty million brick plant, James Little, Pollard, Inc., the Edmonton Brick company, the Acme Brick Co., and the Pressed Bricks Ltd. The estimated output of the various brick companies of ordinary weight brick, pressed brick and sanding brick, is as follows:

James Little, Inc.	2,500,000
James Little, Inc.	2,500,000
Edmonton Brick Co.	3,000,000
Acme Brick Co.	2,000,000
Pressed Bricks Ltd.	2,000,000
Total	20,000,000

The Acme Brick Co. is among the brick companies recently formed in the city for the purpose of preparing for the manufacture of brick by the Acme Brick Co. This company, which was incorporated on February 11, is composed of Wm. Johnston Walker, J. J. Anderson, secretary-treasurer, and J. J. Anderson, manager, all of Edmonton. The company is capitalized at \$25,000 and has purchased 11 acres of land about five miles north of the city on the Monteville branch of the C. N. R. Frequent tests have shown the clay on this property to be of the very best quality for brick making. It extends from the surface to a depth of 15 feet. The property in question is being sold by the city of Edmonton for use this year, to be replaced by a large modern one at a future date. The new plant will cost in the neighborhood of \$10,000 and is estimated to be completed in the summer of 1926. It is expected that the first kiln of 4,000,000 bricks will be ready in the fall.

The work of the manufacturer of the brick at this new plant will be in charge of John Jackson, a man with 22 years' experience in brick making. He has for two years been in charge of the brick yard prior to accepting the present position. In this direction the preliminary work on the plant has already been commenced. The new house for the men has been erected, stable built and a well dug. There will be a truck and a machine at first and this force will be increased later as the work progresses.

The Acme Brick company expect to be able to sell their brick at cheap or cheaper than any other company in Edmonton. The plant will be right on a line or railway so that the company can deliver the brick in the city at a cost of about 75c per thousand, whereas the other brick companies have to pay \$1.25 a thousand. The brick will be hauled up the steep hill from the flats and delivered in the city. The price of brick last year was \$12 per thousand and is now \$10. With the operation two years hence the price should be lowered considerably. Thus comes the end of the building in Edmonton.

Pressed Bricks Ltd. will start manufacturing brick in Edmonton in the spring. The Pressed Bricks Ltd. This is a company formed for the manufacture of brick and has been organized with such prominence as a new building material in the city in the past five years.

The company which has this project in mind is composed of J. J. Anderson, M. D. R. Fraser to president of this company. Charles Fraser, secretary and Alex. McRobbie, secretary-treasurer. The company is capitalized at \$10,000 and is engaged in putting in a \$60,000 plant for the manufacture of brick.

Pressed Bricks Ltd. was organized last year and at once set to work on the installation of an up to date plant. A location was secured from the city of Edmonton on the south side of the river, where there was a large supply of sand and shale. The brick is used largely in the manufacture of sandstone brick. The brick is made in the same manner as the best process and the machinery at once ordered. The machinery is being driven and are installed the same as the best process.

One advantage of this plant is the

SPORTING NEWS

EDMONTON 8, PORTAGE 3

A crowd of ten, twelve hundred people was on hand for the hockey match which was played in the afternoon at the Capital. The game was a very close one, with a score of 8 to 3 on the puck of the home team. The game was the fastest time in the central part of the west.

It was a magnificent victory for the Edmonton team, and clearly indicated that this city has no aggregation that stands the peer of any in the west, if not in the Dominion of Canada at present time.

The Edmonton spectators played as they never played before, and the showing they made filled the hearts of their admirers with pride. In the last six of Monday night games were practically even. Last night, with hard ice, the lighter forwards of the home aggregation out-blissed their opponents at every point of the game, and by the most brilliant work time and again brought the big crowd to the highest of enthusiasm. It was from the start to finish, and at no time in the game did the pace slacken.

The cold weather had brought the eagerly-looked-for hard ice, and conditions were ideal. The Edmonton team took the puck and the first team goal display was made by the Edmonton team both on the ice with the puck. From the first pass off the puck, the game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

In the first period Edmonton notched three goals, while Portage scored one. After the cross over Edmonton got five more, while the Manitoba players took the rubber between the posts but not the puck.

The Edmonton team's playing with an exception was superb. Parr, in goal, was last night's second star of the game, and he had Quinn's performance of the game. Quinn was badly injured. Time and again the referees ruled in favor of the Edmonton team. The referees ruled in favor of the Edmonton team. The referees ruled in favor of the Edmonton team.

After the first period, the men lined up for the second period. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

Portage la Prairie worked hard for the puck. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

The game itself last night was fairly good in places, as natural ice hockey, but any offense was minor. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

The officials were Pete Barley, referee; S. Macdonald, referee-in-chief; line judges, Sheppard and Collins; timekeepers, Russell, Lannon and Lantz.

decease he shot, and the score book was up in the air. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

After the face-off, things got very lively. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

The resulting face-off saw Sevius with the puck, and he started to ramble around for a try, but he failed. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

The following face-off gave the puck to Edmonton, and Deaton took the puck and the first team goal display was made by the Edmonton team both on the ice with the puck. From the first pass off the puck, the game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

After the first period, the men lined up for the second period. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period. The game was a very close one, with the Edmonton team leading 2-0 at the end of the first period.

AMERICA AND JAPAN SMOKE PIPE OF PEACE

Not a Ripple Disturbs Even Tense of Relations Between Two Nations at Present—No Questions of Any Magnitude Remain Unsettled

New York, March 11.—(By declaration of these are now between the United States and Japan for questions of any magnitude likely to remain unsettled much longer, and that any questions arising in the future will be brought to a satisfactory conclusion by the spirit of friendship existing between the two countries, Baron Kato Takahira, Japanese ambassador, called forth pointed cheers tonight at the banquet at the Hotel Astor in honor of his honor by the Japanese society of New York.

The guests of honor and speakers included Governor Franklin D. Roosevelt, Senator Charles McNary, and former Mayor Seth Low. The toast to the president of the United States and the Emperor of Japan was drunk enthusiastically.

President John Finley of the college of the city of New York, head of the Japanese society, was toastmaster. Ambassador Takahira's address was notable for the fact that it touched Japan's enlarged influence on the Pacific, the Asiatic continent as by treaty with Great Britain, which was concluded purely and simply to secure the peace and therefore the prosperity of the Far East, and as to the question of immigration, regarding which, he stated, he was pleased to state to say that he had to have to maintain his rights in all respects, there are now between the United States and Japan questions of any magnitude likely to remain unsettled much longer.

The ambassador as the beginning epoch of the formation of the society between the two nations, to establish and it showed how friendly and sympathetic the citizens of New York have to Japan, and to all of unfavorable speculation spread out among a certain section of this great people.

Touching then upon the question of Jewish and Japanese affairs, Mr. Takahira said: "The emperor is the same person, large minded and dignified, always for the happiness and prosperity of his subjects, and at the same time equally sincere in his desire for the well being and good care of all other peoples."

Brandon's Winsler Factor. Brandon, Mar. 11.—The Winsler factor here attracted a large number of people. The exhibits were of excellent quality. Many prominent agriculturists and visitors were attracted.

Charges Against an Actor. New York, Mar. 11.—Ten jurors have been selected for the Raymond Hitchcock case. The actor is being tried on six indictments, the result of serious felony charges made by a trio of young girls. Hitchcock appeared pale and nervous and is greatly depressed.
